## A Brief About Baby World website

Your baby deserves the best!

Baby world is a baby online store for those who want the best products for their children. It sells clothing, furniture, toys, food, and accessories geared toward young children and their family. The supplier sends the needed supplies to the company factory and with that, they start making all different baby products, package and launch them in the website. Their main goal is to make sure that the customer is getting a pleasant and easy experience with a very fast shipping service that only takes 7 working days.

# Entity Relationship Diagram (ERD):

# RELATIONAL SCHEME:

**Costumer (ID, first,last,Email,address)**

**Costumer-phone( phone\_num, ID)**

**FK:ID references Costumer (ID)**

**Payment(Payment\_ID , payment\_type, payment\_date, ID)**

**FK:ID references Costumer (ID)**

**Order(Address, Traking\_number, order number ,ID)**

**FK:ID references Costumer (ID)**

**Payment\_ Order( Payment\_ID , order number ,ID)**

**FK: Payment\_ID refrences Payment (Payment\_ID)**

**FK: (order number ,ID) refrences Order (order number ,ID)**

**Employee( Number, Birthdate, Name,)**

**Employee\_ Order( Number , order number ,ID )**

**FK: Number references Employee (Number)**

**FK: (order number ,ID) refrences Order (order number ,ID)**

**Costumer\_Employee ( Number , ID, Date)**

**FK1:ID references Costumer (ID)**

**FK2: Number references Employee (Number)**

**Products ( Products\_number, Price , Category )**

**Products\_ Order ( Products\_number , order number ,ID )**

**FK: Products\_number references Products(Products\_number)**

**FK: (order number ,ID) refrences Order (order number ,ID)**
